

Protective Film Rolls for Ultrasonic Welding

Make sure your finished ultrasonic welded products look flawless using PATSONIC's protective film. The protective film greatly reduces or even eliminates part marking caused by vibrations of the ultrasonic horn during ultrasonic welding. The protective plastic comes in various widths, thickness and lengths to ensure proper protection for any ultrasonic welding project. We recommend the protective plastic rolls be used with the PATSONICS protective film winder, but the plastic rolls can be used by themselves. Film rolls are manufactured using cardboard cores, LLDPE food grade film resins, plastic retainers and polypropylene flanges. Film tolerance is +/- 10%.

PATSONICS Film Rolls work with our standard automatic film winders or can be used separately for low volume applications.

<u>Part Number</u>	<u>Description</u>
FWR-32	3" x .002" x 1500' protective buffer film for model FW-2003 film winder
FWR-33	3" x .003" x 1500' protective buffer film for model FW-2003 film winder
FWR-34	3" x .004" x 1200' protective buffer film for model FW-2003 film winder
FWR-52	5" x .002" x 1500' protective buffer film for model FW-2005 film winder
FWR-53	5" x .003" x 1500' protective buffer film for model FW-2005 film winder
FWR-54	5" x .004" x 1200' protective buffer film for model FW-2005 film winder
FWR-72	7" x .002" x 1500' protective buffer film for model FW-2007 film winder
FWR-73	7" x .003" x 1500' protective buffer film for model FW-2007 film winder
FWR-74	7" x .004" x 1500' protective buffer film for model FW-2007 film winder
